

This page provides an abstract for the *CAHSEE - Student List*, which lists all CAHSEE results for all students who have taken the exam.

- See pages 2-4 of the *Interpretation Guide* for help reading the report, using it to answer essential questions, and acquiring more info.

Purpose What are some questions this report will help answer?

- Which students are at risk of not graduating due to the CAHSEE?
- With which subject(s) is each student struggling?
- With which strand(s) is each student struggling?
- How are students performing on the CAHSEE school-wide?
- Which students passed the CAHSEE, and how did this impact API?
- Which students passed the CAHSEE, and how did this impact AYP?

Focus Who is the intended audience?

Teachers and administrators

What data is reported?

All CAHSEE results for every student who took the CAHSEE (you can opt to view only those who passed 1 or both subjects, only those who failed 1 or both subjects, etc.)

How is the data reported?

All students are listed with 1 row of scores per administration period, with their oldest scores on top (e.g., Joey has a row for the time he took the CAHSEE on 11/3/09, followed by a row with his 10/5/10 CAHSEE scores). A graphed summary of results is on the last page.

Warning What do many educators misunderstand?

CAHSEE’s two sections – English-Language Arts (ELA) and Math – must *both* be passed in order to pass the CAHSEE as a whole. Sites sometimes have difficulty obtaining records from students’ previous districts, so a “Previously Satisfied Requirements” (“R”) status can indicate a student previously passed a particular CAHSEE section, even if the passing scores aren’t reflected on this report. See the last page of the report for the meaning of all abbreviations used.
